-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 November 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-28 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. §§ 119 and 120

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 13) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application) since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.
- a) ☐ The translation of the foreign language provisional application has been received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121 since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Morishima et al., (U.S. patent No. 5,589,956).

As per claims 1,10,11-13,16,20,21,25 Morishima shows a method of displaying images using an image display device having two displays (In Fig.28A), each display being arranged in the image display device so as to be capable of presenting an image to an eye of a user (In fig.28B and I col.17 lines 23-32): dividing image data into a first portion having a first reduced data set defining the entire image (element 74 In fig.19 and in col.13 lines 42-54) and a second portion having a second reduced data set defining the entire image (In Fig.19 element 73 and In Col.13 lines 42-54 and In Col.9

Art Unit: 2673

lines 58 67 to Col.10 lines 1-10), the first portion differing from the second portion (As shown In fig.19); generating a right display signal using the first portion of the image signal data; generating a left display signal using the second portion of the image signal data; transmitting the right display signal to a right one of the displays; transmitting the left display signal a left one of the displays; displaying a right image on the right display from the right display signal and displaying a left image on the left display from the left display signal, substantially simultaneously with the displaying of the right image(In Fig.19 element 82 and In Col.20-45).

As per claims 2,17,22-24,26-28 Morishima shows the image signal data includes data capable of describing a source image arrange able into an array of columns and rows wherein a selecting a right set of image data values from the image signal data corresponding to selected points on the array of the source image, the right set of image data values being used to form the first portion of the image signal data and selecting a left set of image data values from the image signal data corresponding to selected points on the array of the source image , the left set of image data values differing from the right set of image data values and being used to form the second portion of the image signal data(In fig.19).

As per claim 3, Morishima shows the step of selecting a left set of image data values includes the step of selecting image data values of which none are included in the right set of image data values (In Fig.19).

As per claim 4, Morishima shows the step of dividing image signal data comprises: transmitting the right and left sets of image data values to an address calculator (element 85 In Fig.19).

As per claims 5,6 Morishima shows the step of generating a right display signal having formatted the right set of image data values and left side of image data (In Fig.19).

As per claims 7,15 Morishima shows the step of displaying a right image on the right display comprises the step of displaying a right image of $n*m$ resolution and the step of displaying a left image on the left display comprises the step of displaying a left image of $n*m$ resolution, wherein n and m are integers (In Col.12 lines 20-42).

As per claims 8,9,14,18, Morishima shows sampling a source image signal to produce the image signal data (In Fig.16 and In Col.13 lines 42-67).

As per claim 19, Morishima shows a digital storage medium for image source 9 in col.13 lines 43-45).

Response to Arguments

3. Applicant's arguments filed 10/29/2003 have been fully considered but they are not persuasive. Applicant's argument that the prior art does not show or suggest dividing an input image into separate portions and providing the separate portions to different eye, Examiner would like to point that In figure 4 reference shows separate image (14-1 to 14-3) and also in Fig.11 (14-1 to 14-2) and I Fig.19 in fact shows that separate image portions of the image been seen on different eye as above figures.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nitin Patel whose telephone number is 703-308-7024. The examiner can normally be reached on 8:00-5:00.

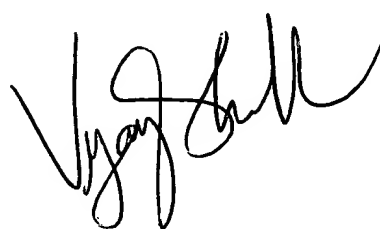

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin H Shalwala can be reached on 703-305-4938. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9314 for regular communications and 703-308-9052 for After Final communications.
